Laboratory Instructions

1. Safety

Students must wear lab coats and closed shoes in all laboratories. Food and drink are not permitted in laboratories.

Students must know the location of the fire extinguisher, first-aid box and emergency exit before starting work.

Any accident, however minor, must be reported immediately to the lab instructor.

2. Attendance and Records

Attendance in every laboratory session is compulsory. A student who misses a session must complete the experiment in a make-up session within two weeks with the permission of the lab in-charge.

Students must maintain an observation notebook and a record. The record of the previous experiment must be submitted before starting the next one.

3. Evaluation

Laboratory courses carry 60 marks for continuous evaluation and 40 marks for the end-semester practical examination and viva voce.

A student must score at least 40% in the end-semester practical examination to pass the laboratory course.

4. Equipment Care

Students are responsible for the equipment issued to them. Breakage or loss due to negligence must be paid for by the student at the current replacement cost.
